

**Annual meeting of the EGIR group 15th-16th May 1998**  
**L'Abbaye des Vaux de Cernay**

**Friday 15 May 1998**

12.00 *Pre-lunch drinks*

12.30 *Lunch*

14.30-16.00

Irène JUHAN-VAGUE	Fibrinolytic factors involved in insulin resistance
-------------------	---

Martine LAVILLE	Defect in the acute regulation by insulin of the expression of genes involved in insulin signalling in NIDDM
Thomas KONRAD	Insulin sensitivity, glucose effectiveness and $\beta$ -cell secretion in patients with HVC-induced liver disease: impact of interferon treatment
Mina MITRAKOU	Circulating tumor necrosis factor $\alpha$ (TNF $\alpha$ ) concentrations are elevated in Type 2 diabetes and relate to the degree of glycemia
Olle MELANDER	$\alpha$ -Adducin gene polymorphism is associated with primary hypertension but not with diabetic microalbuminuria

Michel MARRE	Microalbuminuria and insulin resistance
--------------	---

16.00 *Coffee Break*

16.30-18.00

<b>Presentation of the collaborative group project</b>
--

18.00 *Pre-dinner break*

19.00-20.00

<b>Pre-dinner drinks and Presentation and discussion of the proposed statutes of group</b>
--

20.00 *Dinner*

**Saturday 16 May 1998**

9.00

Michiel BOTS	Measuring inter-media thickness
--------------	---------------------------------

9.30

<b>Discussion of the collaborative group project</b>
--

11.00 *Coffee break*

11.30-12.00

Michel PUGEAT	Insulin sensitizing agents in the polycystic ovarian syndrome
---------------	---

12.00-12.45

Nebojsa LALIC	Impaired daytime fluctuation pattern of plasminogen activator inhibitor I in coronary heart disease in non-insulin dependent diabetes: an association with decreases in insulin sensitivity
Luc VAN GAAL	The dense LDL phenotype and NIDDM: association with insulin and visceral obesity
Beverley BALKAU	Hyperinsulinemia and death from cancer. The Paris Prospective Study.

13.00 *Lunch*

14.30-15.00

Jean-Pierre DESPRÉS	The atherogenic lipoprotein phenotype of insulin resistance: are small density LDL particles an independent IHD risk factor ?
---------------------	---

14.30-15.15

Stephanie BALDEWEG	The relationship between insulin resistance and plasma lipids amongst the EGIR database population
Ferannini's x 2	

15.15-17.00

<b>Discussion - Epidemiological definition of the insulin resistance syndrome</b>
---

17.00  
19.00

*Coffee*  
*Buffet dinner at the Abbaye*
