

**EGIR Meeting 2000**

**Park Zandvoort • The Netherlands • 12-13 May, 2000**

**Thursday: arrival of Project and Steering Committee members**

**Friday 12 May**

9.00 Meeting of the Project and Steering Committees

12.00 Welcome drink

12.30 *Lunch*

14.00 Opening - Jacqueline Dekker (Amsterdam, The Netherlands)

14.05 Prof dr. J. C. Seidell (Bilthoven, The Netherlands) The worldwide epidemic of obesity and type 2 diabetes

14.45 Presentations from members of the group

- J. Yudkin (London, UK) Proinsulin like molecules predict coronary heart disease risk independently of insulin, lipids, PAI-1 and birth weight. Prospective data from the Caerphilly Study
- K. Højlund (Odense, Denmark) Familial hyperinsulinaemia associated with clinical hypoglycaemia and insulin resistance
- D.J. O’Gorman (Dublin, Ireland) Type 2 diabetes in Mexican-American and Caucasian adolescents and young adults: a similar metabolic phenotype
- B. Hedblad (Malmö, Sweden) Cardiac event rate and mortality in relation to insulin resistance in non-diabetic subjects. Results of six-year follow-up from the prospective population study 'Malmö diet and cancer', Malmö, Sweden

16.00 *Coffee*

16.30 Dr. M. Walker (Newcastle, UK) Insulin action in type 2 diabetic families

17.15 Presentations from members of the group

- K. Cruickshank (Manchester, UK) Systematic review of hypertensive treatment outcome trials in type 2 diabetes: is insulin sensitivity irrelevant to outcome?
- A. Charles (Paris, France) Is muscle mass a predictor of the development of diabetes? Results from the Paris Prospective Study
- A. Mari (Padova, Italy) Assessing insulin sensitivity from the oral glucose tolerance test: comparison of methods
- N. Lalić (Belgrade, Yugoslavia) Coronary heart disease in type 2 diabetes: impaired insulin sensitivity is related to lower antioxidant enzyme activity

19.00 Pre-dinner break

20.00 *Aperitif followed by dinner*

# ***EGIR*** European Group for the Study of Insulin Resistance

## **Saturday 13 May**

9.00 B. Balkau (Paris, France) Frequency of the insulin resistance syndrome in some European epidemiological studies

9.30 EGIR Project Strategy Meeting

*10.30 Coffee*

11.00 EGIR Annual General Meeting

*12.00 Lunch*
